Santander

Two yards, a common goal

Two European yards strategically located for any repair or conversion project, highly skilled and reliable.

Located in the Canary Islands - Western coast of Africa - and in Santander - North of Iberian Peninsula - you will find two experienced yards ready to work with the quality and compromise that your vessel or rig demands. Trust the experts.

Ready at short notice

in Las Palmas, Canary Islands

ASTICAN

The right choice

From normal steel or mechanical work, to sophisticated conversion projects, at ASTICAN you will find a professional team willing to fulfil any requirement.

Our modern dry-docking system, together with exceptional climatic conditions, allows us to work comfortably on any type of vessel.

We drydock an average of 200 vessels a year and we can attend your requirements at very short notice.
